INTRODUCTION

The BrightPath Academy website is a multi-page web application developed using HTML, CSS, and JavaScript. The primary aim of this platform is to provide structured information about career-oriented courses and guide learners toward professional skill development. It functions as a digital educational platform where users can explore programs, understand learning pathways, and connect for enrolment or further inquiries.

In today's competitive learning environment, an informative and well-designed website plays a key role in presenting educational services effectively. This project demonstrates the practical implementation of front-end technologies while maintaining clarity, simplicity, and user-friendly navigation.

Key Features of the Website:

- Multi-page structure including Home, Programs, About, Testimonials, and Contact sections
- Clean and organized layout for better readability
- Responsive design for compatibility across devices
- Interactive elements implemented using JavaScript
- Structured navigation for smooth user experience

The Home section provides an overview of the academy and highlights its main offerings. The Programs section explains the available courses and learning structure. The About section describes the mission and educational approach. The Testimonials section reflects learner feedback and experiences. The Contact section allows users to communicate through a simple and structured form.

This project focuses not only on visual presentation but also on usability and logical content arrangement. Core concepts of HTML for structure, CSS for styling and responsiveness, and JavaScript for interactivity have been effectively applied to build a functional and meaningful educational website.

Development Requirements

The development of the BrightPath Academy website required the following hardware, software, tools, and technical knowledge:

1. Hardware Requirements

Device :- Laptop / Desktop

RAM :- Minimum 8 GB (Recommended 8 GB or above)

Processor :- Intel Core i5 or equivalent

Internet Connection (for testing and deployment)

2. Software Requirements

Operating System :- Windows 10 / Windows 11

Web Browser :- Google Chrome / Microsoft Edge

Code Editor :- Visual Studio Code

Netlify :- For website hosting and deployment

3. Technologies Used

HTML – For creating the structure of web pages

CSS – For styling, layout design, and responsive design

JavaScript – For adding interactivity and form validation

4. Functional Requirements

These are the main features the website performs:

Multi-page navigation system (Home, Programs, About, Testimonials, Contact)

Responsive layout compatible with mobile and desktop devices

Programs section with structured course information

Testimonials display section

Contact form with input validation

Proper header and footer structure

Smooth scrolling and interactive user interface

5. Hosting Requirement

Website deployed using Netlify

Internet connection required for online access and live testing

These requirements ensured the proper development, functionality, and deployment of the BrightPath Academy website.

Modules of the BrightPath Academy Website

The website “**BrightPath Academy**” is divided into multiple modules. Each module performs a specific function and is connected through a structured navigation system to ensure smooth user experience.

1. index.html (Main Entry Module)

- This is the main landing file of the website.
 - It acts as the starting point when the website is opened.
 - It loads the overall structure and main sections of the website.
 - It connects the header and different content pages.
-

2. header.html (Header Module)

- Contains the website title and navigation bar.
 - Displays the academy name or logo.
 - Provides links to pages such as Home, About, Programs, Career, FAQs, etc.
 - Maintains a consistent top layout across all pages.
-

3. home.html (Home Module)

- Displays the welcome message.
 - Introduces BrightPath Academy and its key features.
 - Highlights career-focused learning and mentorship support.
 - Includes call-to-action sections for enrollment or inquiry.
-

4. about.html (About Module)

- Provides detailed information about the academy.
 - Explains mission, vision, and objectives.
 - Describes the purpose of skill-based training and professional development.
-

5. programs.html (Programs Module)

- Contains information about available training programs.
 - Explains course structure and learning outcomes.
 - Acts as the main overview page for all program categories.
-

6. beginner.html (Beginner Program Module)

- Designed for entry-level learners.
 - Explains foundational concepts and basic skill training.
 - Suitable for students starting their learning journey.
-

7. intermediate.html (Intermediate Program Module)

- Designed for learners with basic knowledge.
 - Covers advanced topics and practical project work.
 - Focuses on strengthening technical and professional skills.
-

8. formats.html (Formats Module)

- Describes formatting concepts related to web development.
 - Demonstrates examples of structured content and layout techniques.
 - Organized using headings and properly formatted text.
-

9. career.html (Career Module)

- Provides information about career opportunities.
 - Explains placement guidance and professional growth support.
 - Highlights the benefits of completing academy programs.
-

10. quickinquiry.html (Quick Inquiry Module)

- Contains a short inquiry form.
 - Allows users to submit basic details for quick contact.
 - May include simple validation for required fields.
-

11. faqs.html (FAQs Module)

- Lists frequently asked questions.
 - Provides clear answers to common student queries.
 - Helps users understand programs without direct assistance.
-

12. newsletter.html (Newsletter Module)

- Allows users to subscribe for updates.
- Collects email addresses for announcements and course updates.
- Supports ongoing communication with learners.

Code Snippets

1. HTML Navigation Bar Code:

```
<!DOCTYPE html>
<html lang="en" data-page="home">
<body>
  <header class="site-header">
    <div class="brand">BrightPath</div>
    <button id="menuBtn" class="menu-btn" aria-label="Toggle
navigation">Menu</button>
    <nav id="mainNav" class="main-nav">
      <a href="home-content.html" target="contentFrame" data-
nav="home">Home</a>
      <a href="programs-content.html" target="contentFrame" data-
nav="programs">Programs</a>
      <a href="about-content.html" target="contentFrame" data-
nav="about">About</a>
      <a href="testimonials-content.html" target="contentFrame" data-
nav="testimonials">Testimonials</a>
      <a href="contact-content.html" target="contentFrame" data-
nav="contact">Contact</a>
      <a href="home-content.html" target="contentFrame" class="btn btn-
primary">Enroll</a>
    </nav>
  </header>
</body>
</html>
```

2. HTML Index Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0" />
  <title>BrightPath Academy | Home</title>
</head>
<frameset rows="78,*,64" frameborder="0" border="0" framespacing="0">
  <frame src="header.html" name="topFrame" scrolling="no" noresize />
  <frame src="home-content.html" name="contentFrame" />
  <frame src="footer.html" name="bottomFrame" scrolling="no" noresize />
```

```

<noframes>
  <body>
    <p>This page uses frames. Open <a href="home-content.html">Home Content</a>
if frames are unavailable.</p>
  </body>
</noframes>
</frameset>
</html>

```

CONCLUSION

The “BrightPath Academy” website was successfully developed using HTML, CSS, and JavaScript. This project helped me understand how to design a structured multi-page website with proper navigation and user interaction.

Through this development, I improved my practical knowledge of front-end technologies and learned how to organize content effectively to create a clear, responsive, and user-friendly educational platform.

FUTURE SCOPE

The **BrightPath Academy** website can be further enhanced by integrating advanced features and backend functionality. In the future, the platform can be connected to a database to securely store user information, manage enrollments, and implement a proper login and registration system.

The project can be upgraded into a fully dynamic website using backend technologies such as PHP, Node.js, or other modern frameworks. Features like student authentication, personalized dashboards, course progress tracking, and program enrollment management can be added.

The design can also be enhanced with modern UI improvements, better animations, and performance optimization to ensure smooth access across all devices. In the future, the website can evolve into a complete online learning platform with cloud-based hosting and scalable infrastructure for wider accessibility.
